

## Fully Vaccinated

---

### **You are considered fully vaccinated against COVID-19:**

- 2 weeks after a single dose of the Johnson & Johnson (J&J) **COVID-19** vaccine **or**
- 2 weeks after the second dose of a Pfizer or Moderna **COVID-19** vaccine 2-dose series **or**
- 2 weeks after finishing the series of a **COVID-19** vaccine [listed for emergency use by the World Health Organization](#) (for example, AstraZeneca/Oxford and Sinopharm)

If it is less than 2 weeks after your second or only dose, you do not have enough protection from the COVID-19 virus. It takes time for your body to build immunity. Continue to take prevention steps until 2 weeks have passed.
